

Groentes Vegetables

Agro-Organics

Newsletter 8
22 February 2007

Is daar weerstandsprobleme, of n' behoefte vir wye spektrum beheer? Is there a resistance problem, or a need for wide spectrum control?

Agro-Organics het enkele insekdoders en swamdoders wat op groente onder Wet 36 geregistreer is of in proses is om geregistreer te word onder andere Xterminator (tamaties), Expellar (aartappels) en Bio-Tricho (slaai, Tamaties, Rissies, Tabak) — ingehandig vir registrasie.

Tans is ons onder die SAPIP (South African Product Initiative Program) program besig met nog registrasies op groente Dit sluit in: uie, pampoengewasse, wortels, slaai, ertjies, tamaties, groenmielies sowel as bessies, neute en granadilla. Probleme wat onder hierdie registrasies aangespreek word, sluit in: roospinnekop, plantluis, blaaspootjie, witvlieg, landmeters en nematodes, poeieragtige skimmel en Alternaria. Produkte wat

tans op groente in die pyplyn vir registrasie is, sluit in: Bio-Neem + Bio-Tode 1 & 2, Kingbo, Bio-Insek, Citro-Cure-Plus, Bio-Protector.

Kontak Dr. Strauss Ferreira asseblief vir 'n aanbeveling vir enige siekte- of insekprobleme in u area.

Agro-Organics has a few insecticides and fungicides which are registered on vegetables under Act 36 or are in the process of registration i.e. Xterminator (tomatoes), Expellar (potatoes) and Bio-Tricho (Lettuce, Tomatoes, Peppers, Tobacco) — submitted for registration.

At present we are busy with more registrations on vegetable crops under the SAPIP

(South African Product Initiative Program) programme. These include onions, cucurbits, carrots, lettuce, peas, tomatoes, mealies as well as berries, nuts and granadilla. Problems which are addressed under these registrations are red spider mite aphids, thrips, white flies, loopers, nematodes, bollworm, powdery mildew and Alternaria. Products currently in the pipeline for registration: Bio-Neem + Bio-Tode 1 & 2, Kingbo, Bio-Insek, Citro-Cure-Plus, Bio-Protector.

Please contact Dr. Strauss Ferreira for a recommendation if there are any insect or disease problems on vegetables in your area.

ONTLEDINGSDIENS - PLANTSIEKTES

Dr Strauss Ferreira (Ph.D Plantpatologie; Pr Sci Nat no 400083/99)

Sel no. 082 3385561

- 27 Jaar navorsingsondervinding op oa wingerd (21 jr), tabak, mielies, grondbone, sonneblomme.
- Vinnige uitslag: Phytophthora en Pythium ontledings +/- 5dae
- Ander siektes 7 – 10 dae
- Professionele en praktiese aanbevelings vir siektebeheer

MONSTERNEMING:

1. Grond:
Soos vir aalwurmontleding, sien Pro Crop vir aanwysings van Nemlab
2. Plant:
Plant wat besig is om dood te gaan. (Plante wat

reeds geruime tyd dood is bevat te veel saprofiete, wat isolasie van veroorsakende patogene bemoeilik)

3. Inligting:

Volledige inligting van agent (sel no en e-pos adres)
Volledige inligting van produsent
Gebruik verkieslik Nemlab vorm.

MONSTERS KAN GESTUUR WORD NA:

- of Nemlab
- of Agro-Organics
- of Rokewoodlaan 16, Die Boord, Stellenbosch

Sou u van enigiemand weet wat graag ons nuusbriewe sou wou ontvang, laat weet ons asseblief! DANKIE.
